They design Jungle Heat on a fun cartoon-style graphic platform combined with online gameplay. The developer makes the battles more intense and dramatic than ever. The game has many similarities with other famous titles like Clash of Clan, Backyard Monsters, or Edgeworld. The difference is the modern battles with the first appearance of dark weapons. The gameplay perfectly combines strategy games with city construction and management. The achievement system can help you mark the key milestones in your accomplishments. They provide a tutorial system in a simplified form, allowing players to play while exploring the specialties for themselves in the story. Specifically, in the Jungle Heat, players will begin to build their base with mining oil, gold. You must protect the command center from enemy attack. If the base is poorly defended, other players can organize an attack and take control of the city. This means that you have completely failed in this war. As a real-time strategy game, players Heat can use diamonds to support the construction process faster. In addition, you need time for the completed work to build other projects. In the heat of the jungle, attacking the enemy is also a form for players to earn more money, experience points, and own unknown lands. Thus, before attacking, the player can look at the layout of the bases and troops on the map. When you are ready to attack, locate the enemy who must killed, this unit will attack the nearest enemy structure. In addition to building ramparts, players must also pay attention to building a powerful army of the same variety with more than ten types of units such as Spies, Riflemen, Nurses, and Rambo. Each unit has distinct strengths and weaknesses. Therefore, the decisive factor lies in the tactics and coordination of army forces. The gameplay of Jungle Heat is the same as Clash of Clans. Players must build their bases in the game, train troops, attack and accept counterattacks from other players. The game uses a cartoon style. It displays the buildings and the army in playful comic form. The scene of the shooting was ferocious. And the scene of the shooting between the two armies had a good visual impact. Unlike other types of Clash of Clans that highlight realism, this game is humorous and can bring a sense of joy in addition to intense battles. Players can attack other players' base camps with troops they have trained. Other troops must also baptize them. The game is simple to use and full of fun. First of all, it is a game to develop and plunder others. So, on the enemy base, press the ground on the screen to drop your troops. Then press and hold to do a collective parachute. You should know that the location of the air drop cannot be on the green ground in the image. Click on the icon below to select the troops you want airfield. Parachute troops are not unlimited. That means we can't get them back. For the number of troops, you fly in, even if a troop is not dead. But the hero can be used all the time. And the main target of the attack is the enemy's base camp. You must attack the enemy base and also defend our base. But build the cannon first. Click on the store, then select the cannon to build. The cannon can play a defensive role. We suggest you build a watchtower and use walls to enclose important places, such as base camp. You can use diamonds to speed up completion. At first, it is free to help novices accelerate and does not consume diamonds. However, diamonds are needed in the last step, so save diamonds. After talking about defence, we should talk about the two most important resources of our game, oil and gold coins. Let's talk about gold coins first. Gold coins can build buildings. Thus, gold coins are essential for defense construction, especially for large consumers. Gold coins can build gold mines. You should build more gold mines at an early stage. The modernization of gold mines can also increase the speed at which gold coins are acquired. After talking about gold coins, let's talk about oil. Oil is more useful than gold coins. Oil can be obtained by building oil wells. The modernization of oil wells can increase the rate at which oil is obtained. In addition, oil can train troops. The larger the troops, the more oil we consume. In Jungle Heat, the game will turn the Jungle into a battlefield. As you'll see below, this is a very similar game to Clash of of that we must create our army and go to war. But unlike Clash of Clans, this time we'll be in the jungle. We will have to collect minerals and elements of our environment to build our army and improve our base. The main resources we will have at our disposal are oil, precious stones and gold. One thing that makes the game fun is the inclusion of heroes. They gave superior characteristics and functions to other characters. These heroes will be familiar to us. These are nods from well-known characters and in the collective imagination of all such as Indiana Jones, Lara Croft, Rambo, and Chuck Norris. The game is multi-platform so we can deal with users from different platforms, such as iOS, Android, or Facebook. There are different game modes. On the one hand, we will have a campaign mode, but we will face user foals in tournaments where we can get significant rewards. In tournaments, you can compete with other players. Tournaments always have five days where 9:00 (CET) in winter and 10:00 (CET) in summer is always the deadline. Once a tournament ends, it mixes perfectly with a new one. There are two types of tournaments as single tournaments and clan tournaments. For the single tournament, once you have reached a score of 500 points, you are eligible to participate in the next tournament. There are 100 players with about the same number of points grouped together. The person who has risen higher than the rating scores at the end of five days will win the tournament. They will award the first three places with diamonds. The amount of diamond depends on the scoring class in which you start. With the clan tournament, once a clan with an overall score has 5000 points, it joins a clan tournament automatically. There are 20 clans with a similar number of points grouped together. Clan tournaments only take five days. Each player receives the clan for a fight alongside ranking points and trophies. The number of cups depends on the area of assessment point in which you find yourself. In the recent update, in addition to an overall performance improvement and a substantial bug fix, the developer brought a feature requested by players to progress multiplatform. We can play Jungle Heat on different platforms. It is available on Android, iOS and even Facebook to enable cross-save search for different devices in settings.
